DETAILED ACTION

Acknowledgment is made of the preliminary amendment filed on December 08, 2005.

Claims 1-17 are currently pending.

Drawings

1. The drawings are objected to because figure 10 contains foreign language characters. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 2876

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

3. This application is in condition for allowance except for the following formal matters:
in claim 1, line 2, substitute "such as" with --including--; and
in claim 5, line 2, substitute "such as" with --including--.

Allowable Subject Matter

4. Claims 1-17 are allowable over prior art.

5. The following is a statement of reasons for the indication of allowable subject matter:
although a barcode readers for a play toy are known, the prior art of record fails to teach or fairly suggest either alone or in combination thereof:

a play toy equipped with a barcode reader and a barcode reader for a play toy comprising:
a movable member formed with an opening for guiding light beams reflected from the
barcode to the barcode sensor and movably held by a reader; and
a barcode sensor moving mechanism for moving the barcode sensor within a movable
range corresponding to the opening without using electrical power;

Art Unit: 2876

wherein the movable member is held by the reader body so as to be relatively moved with respect to the reader body from the father forward position to the closer forward position while being pressed onto an article, and to be relatively moved with respect to the reader body from the closer forward position to the father forward position when pressing of the movable member onto the article is released.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Uchimura et al. (US 5,602,379) teach an optical code reader.

Goldman et al. (US 6,036,094) teach a hand-held optical scanner for reading two-dimensional bar code symbols and the like.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
